EMPLOYEE ATTENDANCE DASHBOARD

Project Type: Personal Excel Project
Tool: Microsoft Excel 2016/2019
Field: Data Analysis and Office Administration

1. Project Objective

The objective of this project was to develop an Excel-based employee attendance reporting system that organises attendance records, calculates attendance indicators automatically, and presents departmental attendance patterns through a dashboard.

2. Key Features

- Structured employee attendance register.
- Dropdown lists for consistent attendance-status entry.
- Automated calculations using Excel formulas.
- Summary indicators showing total employees, attendance counts and attendance rates.
- Department-level attendance summary and comparison chart.
- Tested formula-driven updates when attendance records change.

3. Skills Demonstrated

Microsoft Excel, data organisation, data validation, formula writing, percentage calculations, data visualisation and reporting.

4. Project Outcome

Developed and tested a functional attendance dashboard using fictional employee data to demonstrate how spreadsheets can support routine workplace reporting and decision-making.

Note: All employee records used in this project are fictional and intended for demonstration purposes only.
